## Ready to Make the Move to Oracle Release 12?

Estuate can save your organization more than 50% on your  
Oracle E-Business Suite Release 12 upgrade

## Move to Release 12 without impacting your users

### ADD-ON OPTIONS

- Full R12 upgrade planning and migration assessment, covering all Oracle EBS modules (fully supported by Rapid E-Suite)
- Upgrade all remaining operating units, migrate master data and open transactions (with Rapid E-Suite license)
- Move customizations to R12 that are not replaced by R12 functionality
- Further implementation of new Release 12 Functionality.

In as quickly as 2-4 weeks, Estuate will help your organization upgrade one operating unit to Oracle E-Business Suite (EBS) R12, providing the basis for your remaining R12 upgrade.

Using the Rapid E-Suite solution, we will extract your current configurations and setups from your 11i environment in a secure process, and assist you in transforming the 11i configurations into R12 formats. Once configured, we'll inject these configurations into a fresh R12 instance.

Your 11i configurations and setups are important to plan the R12 upgrade. We provide digital documentation of your 11i instance, and show you how to use this for R12 planning.

## Deliverables

- Working R12 instance with customer-specific configurations and setups from your 11i environment
- Detailed documentation of Release 11 configurations and setups in the form of BR100 reports and linked spreadsheets
- R12 EBS Tax and General Ledger configurations—based on 11i functionality

## Benefits

- Reduce your R12 upgrade costs and duration by at least 50%
- Reduce impact on business operations, impact on application users and get off 11i faster
- Avoid 11i de-support and increased support fees
- Base your Oracle EBS R12 upgrade plans on facts relevant to your organization, and build the plan fast with an upgrade of one business unit.

**Parameters & Scope:** Oracle EBS modules (including GL, AP, AR, FA, PO, INV, OM) for one Operating Unit and Set of Books. Master Data included: banks, suppliers and customers.

**Note:** Rapid E-Suite supports the full range of Oracle EBS modules, so we can tailor the scope to your specific module configuration.
