

How do you make a clear choice between a free database server like MySQL and an enterprise database like Oracle?

Oracle beats MySQL for critical deployments

The world-class functionality in Oracle enables our clients to migrate their applications written using other databases, such as MySQL, Microsoft SQL Server and Sybase, in a matter of weeks. Migrating databases and their accompanying applications is not a minor business undertaking. Our experienced migration services allow clients to migrate their applications to a world-class database platform quickly, at a reasonable cost and minimal risk. This stream lines your database operations and reduces your applications management cost.

How we Reduce your Migration Risks at a Reasonable Cost

- Over 200 combined years of Oracle tech experience means:
 - Expert Oracle database version knowledge from 5.1 going forward
 - Over 80 Oracle practice experts
 - Imbued deep application migration expertise from legacy platforms to Oracle
- Expert project work conducted at Oracle in Oracle's Migration Competency Center
- We provide a one-stop-shop for migrations: POCs, pilots and demos.
- Execute migration projects with a global delivery model: offshore, right-shore and onsite. Cost effective coupled with superior productivity.
- We reduce your risk with fixed price migration service offerings.
- Proficient and experienced in implementation and management of [Oracle E-Business Suite](#), [PeopleSoft](#), [JD Edwards](#), [Siebel](#) providing migration efficiency and effective integration.

Hidden Costs Overlooked in Open Source Databases

The many enterprise-class features of Oracle have made it the standard database in many IT organizations. In recent years, open source databases have challenged Oracle with lower cost alternatives. Total cost of ownership considerations in a database acquisition:

- Open source databases may have lower up-front cost with small volumes, but costs increase exponentially with complexity and size
- Besides the initial cost of purchase, one must address the cost of hiring and maintaining appropriate skills for database administration and maintenance. Oracle DB skills are more abundant and plentiful providing more economic choices.
- Oracle support is much more robust than open source alternatives delivering availability to the business and mitigating the costs of business interruption.
- Oracle stands alone with excellent high availability features such as RAC, Data Guard and Streams. Running business applications such as PeopleSoft, JD Edwards, Siebel and the Oracle E-Business Suite the Oracle Database Server is in a class by itself affecting revenue, cost of operations and user experience.

The Benefits of Migrating to Oracle from MySQL

- Guaranteed scalability as your applications grow with your business
- High reliability, ensuring you meet SLAs for critical applications Up to 50% higher DBA productivity with standard
- Oracle management and monitoring tools like Enterprise Manager

Our Aggressive Fixed Price Migration Package Services

Application Objects	Low Complexity	Medium Complexity	High Complexity
Tables	100	250	5000
Views	100	250	5000
Objects(Indexes, Groups, Roles, Users, Constraints, Privileges)	<1000	<3000	5000
Procedures	40	75	100+
Functions	40	75	100+
Triggers	25	40	75
Price	\$25,000	\$50,000	\$75,000

In some cases, additional application-level changes are required to complete the migration; we estimate these for each application, on a case-by-case basis.

We can handle all aspects of your MySQL or other database migration. Are you ready?

Why Estuate?

Estuate is a global technology services company, headquartered in Sunnyvale, California, with additional offices in Canada, India and the UK. Estuate's key service offerings include [Oracle Services](#) and [IBM technology implementation, custom application and product engineering](#), as well as [business intelligence, Big Data](#) and [software management](#). Estuate's dedicated teams help clients throughout the technology lifecycle by aiding during the planning phase as well as the post-deployment phase.

Estuate focuses on building deep relationships with enterprise software companies through product engineering, and providing implementation and custom application development services to customers. We help our clients strategize to get the most from their technology reduce total cost of ownership and streamline daily software management tasks so that their internal teams can focus on critical business objectives. This innovative strategy creates win-win relationships with software partners and clients across a wide range of industries.
