

A person stands on a rock in the middle of a body of water, with their arms raised in a gesture of triumph or joy. The background is a vibrant sunset sky with orange and yellow hues near the horizon, transitioning to a deep blue at the top. The water reflects the colors of the sky. The overall mood is one of achievement and success.

Estuate streamlines closing (accounting) and collection processes for Mindvalley

Mindvalley is a global learning experience company that publishes ideas and teachings by the best authors in personal growth, well-being, spirituality, productivity, mindfulness, and more – and combines them with cutting-edge sophisticated learning technology within engaged and supportive communities. The company is headquartered in Kuala Lumpur, Federal Territory.

1. Business Challenge

Owing to a large product portfolio and transactional database, Mindvalley wanted a seamless closing process in their accounting cycle and also a cohesive collection process in place. In functional terms, they wanted:

Accurate SKU data for all product variants

Correct mapping between products, chart of accounts, and revenue recognition rules

Proper transactional accounting code and revenue distribution for all invoice items

Automated dunning for quicker collection recovery

2. Estate Solution

Estate leveraged its world-class technical edge to help Mindvalley automate its accounting and collection activities.

- **Standardized SKU formatting** for all products
- **Mapped products with chart of accounts** and right revenue recognition rules
- **Implemented manual recognition** to align to custom revenue recognition instead of invoice-based recognition
- **Transformed existing revenue and accounting** codes to expected values
- **Implemented workflows** to automate the dunning process
- Suggested **changes for seamless future business** transactions

3. Business Impact

Mindvalley gained tangible business benefits with Estuate's next-gen technology expertise.

Easy SKU-based identification of product families

Updated product catalog ready to meet new business requirements

Streamlined revenue distribution and accounting codes updated with past two years' transactions

Automated workflow-based dunning notifications for customers

Simplified collection process owing to integration of configurable payment retry rules
