

Managed Oracle Patch Prioritization & Remediation

Turn Oracle’s growing patch volume into
prioritized, actionable risk reduction.

Oracle security releases are becoming more frequent. With monthly CSPU fixes alongside quarterly CPU releases, organizations have more patches to assess, prioritize, test, and deploy. The challenge is knowing which vulnerabilities matter to your Oracle environment and what to remediate

ORACLE PATCHING IS ACCELERATING

More releases mean more patches to assess, prioritize, test, and deploy.

HOW ESTUATE HELPS

Estuate’s Managed Oracle Patch Prioritization & Remediation service turns Oracle security releases into a risk-ranked, actionable remediation plan.

EXPLOITABILITY-BASED PRIORITIZATION

Prioritize vulnerabilities based on
exploitability and risk, not CVSS scores
alone.

ENVIRONMENT-SPECIFIC MAPPING

Establish a repeatable patching
process without adding internal
headcount.

MANAGED TESTING & DEPLOYMENT

Test and deploy prioritized
patches, not just provide
recommendations.

MONTHLY PATCHING CADENCE

Establish a repeatable patching
process without adding internal
headcount.

EXECUTIVE & COMPLIANCE REPORTING

Get clear, audit-ready visibility into
patch priorities, status, and
remediation every cycle.

ESTUATE

ORACLE EXPERTISE ACROSS YOUR ENVIRONMENT

Estuate operates as the execution layer between Oracle's security releases and your IT environment, helping you prioritize and remediate security risks while remaining on official Oracle support.

ORACLE DATABASE

ORACLE FUSION MIDDLEWARE

ORACLE E-BUSINESS SUITE

FROM ORACLE SECURITY RELEASE TO REMEDIATION

A structured, repeatable process helps teams focus on the vulnerabilities that matter most and move from assessment to remediation faster.
