

Global Hospitality Amenities Manufacturer Modernizes Enterprise Analytics

A global hospitality amenities manufacturer modernized its enterprise analytics environment by unifying data from five enterprise systems on Incorta. Estuate improved dashboard performance, data availability, and data trust while enabling faster business decisions.

1. Business Challenge

The client needed to modernize its analytics environment while improving data availability, performance, and reporting accuracy. They wanted to:

-  Unify data from 5 enterprise systems and reduce the complexity of multiple processing layers
-  Improve data availability, as one-hour refresh cycles limited timely access to business insights
-  Modernize 25+ Power BI dashboards while maintaining accurate reporting across key business functions

2. Estuate Solution

Estuate modernized the client's analytics environment using Incorta, enabling faster access to trusted business data.

- Automated workflow analysis and SQL generation using AI
- Leveraged Incorta Direct Data Mapping to reduce traditional ETL dependencies
- Modernized 25+ Power BI dashboards across 6 business domains
- Enabled near real-time data availability and self-service analytics
- Validated data at the field level to ensure accuracy and integrity

3. Business Impact

Estuate improved analytics performance and data availability while enabling faster, more informed business decisions.

Achieved **70–80% faster dashboard performance** compared with the previous analytics environment.

Improved data availability from **approximately one hour to minutes**, enabling faster decisions.

Modernized **25+ dashboards across 6 business domains** with unified data from **5 enterprise systems**.

Achieved **100% data integrity validation** through field-level reconciliation, improving trust in business insights.
